Dear Interested One:

International Institute of Medical Science Hospital and Clinics (IIMS/HC) maintains one of the finest medical treatment facilities in the world. Our program is not considered an island treatment facility. We are a full service hospital with the most modern full service facilities in the world.

IIMS/HC also maintains aggressive research programs dealing with all aspects of Chronic Degenerative Disease (CDD). Currently, research emphasis is in the area of cancer, HIV/AIDS, M.S., cardiovascular disease, severe allergies, arthritis, and viral diseases such as EBV. All programs of therapy and treatment are programs utilized previously with proven results. If at any time, an experimental program is utilized, it is done with the full knowledge of the patient. Please read the package completely to understand our program(s).

We trust after complete review of our Admissions information package you will be fully informed as to our services.

Trusting for good health and longevity!

The Administration
A WORD FROM THE DIRECTOR

Dr. Gregory E. Caplinger MD, DSc., FACIP, FIAM

Many ask why are we so successful?
Do we have cures for cancer, AIDS, or other C.D.D. 's -NO. However, we have found a cure for something more serious - lack of concern!

In today's technologically advanced medical system we have somehow forgotten about the basic human needs of CARING. Here at IIMS we work diligently because we do care. We feel for each and every suffering patient.

Further, we have discovered a new Biological Medicine and protocol: Immu Stim / CAP Immunological Protocol, which is effectively being utilized in the treatment of cancer and HIV/ AIDS (see the brochures entitled Advanced in... Treatment, 1998).

It is therefore our goal and conviction to provide the best care possible.

We are believing for your Health and your need for a miracle.

Sincerely,

Dr. Gregory E. Caplinger MD, DSc., FACIP, FIAM
DIRECTOR
International Institute of Medical Science Hospital and Clinics (IIMS/HC) is a division of the parent Company, THE RAPHAH GROUP, LTD, which is a well known organization serving Latin America and the Caribbean in the area of health care and medicine. Further, the facility is not an offshore clinic for foreign patients. It is and was created for Dominicans with an emphasis on “Chronic Degenerative Disease” (CDD).

PROGRESSIVE THERAPY FOR CHRONIC DEGENERATIVE DISEASE

International Institute of Medical Science Hospital and Clinics of Santo Domingo is one of the most progressive and innovative facilities in the world. International Institute of Medical Science integrates successful and proven therapies from around the world in an individualized manner to effectively treat the patient as a person. International Institute of Medical Science has incorporated into the philosophy of the institution the thought, “WHERE THERE IS LIFE, THERE IS HOPE!”.

International Institute of Medical Science is an affiliate of and a entity within “CENTRO MEDICO GAZCUE” and therefore has access to progressive research, 24 hour on call physicians and all of the ancillary services...

All out-patients are housed at various hotels sitting on the Caribbean with every amenity available. Patients are cared for either as ambulatory (outpatients) or admitted to the hospital depending on the need(s) of each.
International Institute of Medical Science firmly believes that every patient program begins with a complete evaluation as to the, "etiology" (cause) of their disease. Therefore, the clinic maintains state of the art facilities:

- Complete Laboratory - SMAC/CBC
- Immunology Laboratory
- Tumor Market Studies for Cancer
- Endocrinology Evaluation (Hormones)
- Phase contrast Microscopy (Medical Microscopy)

Innovative method for screening for 59 different disease entities and monitoring a patient's progress daily. Further, Dark Field Microscopy is utilized regularly.

- Complete Non-Invasive Vascular laboratory
- D-I/R Computerized Scanner for complete 3-D scans of the entire human body.

PROGRESSIVE THERAPIES

After a patient is completely evaluated, they are placed on an individualized program to address their specific needs. All programs are directed by our staff physicians.

Therapy, as stated, is an individualized approach with the utilization of the major four approved therapies (cancer) being: (1) Surgery, (2) Chemotherapy (low dose/ fractionated dose), (3) Radiation (low dose), and (4) Immunotherapy.

Protocols following ASCO (American Society of Clinical Oncology) are observed with modification(s).

Further, in conjunction with new data from NCI (National Cancer Institute / USA) and the international comunity, it is realized that proper diet and emotional factors (stress, anxiety, etc.) play vital roles in patients. Therefore, these factors are addressed with each patient.

The general emphasis therapeutically for most "CDD's" in the Oncology Department is that of Immunotherapy. Since the late 70's the founders have been utilizing what is now a proven successful group of "Biological Medicines" and a protocol known as: ImmuStim® / CAP Immunological Protocol. This medicine and protocol have proven to be very successful and with little or no adverse effects.
The various protocols and medicines used, to name a few, are:

P - C Immunotherapy Protocol (ImmuStim®/CAP Immunological Protocol) one of the more successful cancer immunotherapies utilizing proven immunological medications.

ImmuStim® a successful non-toxic “Biological Medicine” prepared specifically for the needs of the patient. Used in cancer, HIV / AIDS, M. S. EBV, arthritis and most if not all Chronic Degenerative Diseases which normally have as a causal factor an Immunological deficiency.

Amino Acid Hyperalimentation - I.V. amino acid therapy

Progressive Pharmacology - The department/clinic maintains an advanced pharmacy and their own pharmaceutical company. Products used include: (New products/Biologicals are in development.)

Immu Stim Tabs - a proven immunological medication which stimulates T cells, B cells and NK cells.

Fractionated Dose Chemotherapy - a low dose approach to cancer chemotherapy.

Interferon - immunotherapy for some cancers

Interleukin - one of the most effective immunological drugs utilized for cancer, HIV/AIDS, Hepatitis C, etc.

Other treatment methods include whole body hyperthermia, multiple wave oscillation (MWO) therapy, Radio Lazer therapy (medium range lazer for tumors), Radiation therapy (low dose - Linear accelerator) surgery as needed and nutritional adjunctive therapy. These are only a few of the many unique products and services utilized.

FACILITY

International Institute of Medical Science Hospital and Clinics

is unique in that the “ambience” or atmosphere is one of comfort and quality with a sense of home. Therefore, the patient feels more relaxed without the sense of being in a hospital.

International Institute of Medical Science maintains an ultra modern facility with ICU, modern surgical suite, outpatient IV therapy suite and 100+ private rooms with space for a companion to sleep.

Further the Hospital / Clinic is constantly expanding and building to better serve the needs of patients.
AFFILIATE(S)

International Institute of Medical Science Hospital and Clinics maintains strong relations with some of the “top” medical facilities, hospitals and doctors throughout the world. To name a few they include:

1. CIMEQ - the leader in scientific / medical developments in Latin America. (located in Havana Cuba)

2. Sussex General Hospital / Sussex Medical Centre - a leader in the area of immunology in Europe (England - UK/ consultation facility - group).

3. International Institutes of Health - which is an International Institute patterned after the NIH of the USA. The primary function of the IIH is to gather, evaluate and disseminate medical information related to CDD’s and new innovative treatments.

Further, the department/clinic is continually building relationships with physicians and clinical facilities worldwide to better treat the patient.

INTERNATIONAL STAFF

Each patient is assigned a team of physicians, nurses, therapists and peripheral health care professionals from “literally” every discipline as needed. The Department has a staff of nationally and internationally known physicians.

The department is under the direction of a leading pioneer in immuno-oncology holding both clinical (M,D.) and research (D.Sc.) degrees in medicine.

All of the treating physicians are licensed to practice medicine in the Dominican Republic and hold Board Certifications in the Dominican Republic, USA or Europe. They also serve key positions in various medical schools and are active in research in CDD’s.

The staff utilizes the team approach with each patient. Prior to the start of intensive therapy, a team of physicians carefully reviews the diagnostic data and formulates the best approach to therapy to receive for maximum results.

Patient in Treatment

Dr. Ramón Félix, Chief of Oncological Surgery
FEES

Normal treatment may be either in hospital or outpatient. Please note the following fees: (approximate and may change without notice). Further, a deposit of U. S. (variable and to be determined according to history and prognosis) is required prior to arrival (this depends upon pre-arrival review of records and medical history). The fees will be subtracted from the deposit. In the event a refund is due, it is issued upon discharge.

Each patient needs to plan an initial visit of up to thirty days (plus).

** GENERAL SCHEDULE (Cancer - HIV/AIDS)

** The noted schedule is based upon an average patient. Further, the program(s) at the Institute are considerably less expensive than other available programs. At times the Institute's fees are 70% less. All fees noted are for the standard ambulatory program.

ALL PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE!

FINANCES

An initial deposit of (VARIABLE) is due prior to arriving at the facility.

This is done via bank wire.

Thereafter, each Friday the responsible party will be presented a bill of the balance to be paid in full with certified US funds. Personal check(s) cannot and will not be accepted. At times the facility is able to accept credit card payments.

The fees include the entire program except medications (for take home) and additional analysis if needed, which are all very reasonable. However, the primary ImmuStim medications are included as indicated in the financial letter.

INSURANCE

We do not accept insurance directly in most cases. However, all receipts are coded with the accepted US/European codes for reimbursement. Many companies do reimburse however, we work in conjunction with an Internationally recognized insurance clearing house and our own insurance department which recovers up to 90% of claims. Further, they may be able to pre-approve your treatment.
STAFF

Each patient is evaluated by a team of physicians headed by our internationally renowned oncologist/immunologist Dr. Caplinger.

Once again, the hospital maintains a complete staff of physicians covering all specialties from the Dominican Republic and throughout the world.

DISCHARGE

Each patient is discharged with a complete program consisting of:

1. Diet
2. Medication(s)
3. Special Treatment(s)
4. Exercise
5. Follow-up Directions

As stated, many times we coordinate with your local physician and other doctors in your area. Further, as stated, we are not an offshore treatment facility. Patients choose our facility from other countries because we have proven treatment programs that combine approved therapies from around the world.

Further, we are now in the process of setting up a network of worldwide physicians for patient follow up and treatment.

ADMISSIONS

Admissions may be arranged by your physician or yourself. For admission arrangements and information (fees, programs, insurance info, etc.) please contact us at: (Physicians inquire welcomed)

INTERNATIONAL INSTITUTE OF MEDICAL SCIENCE HOSPITAL AND CLINICS
C/O Centro Medico Gazcue
Ave. Bolivar No. 357
Santo Domingo, Dominican Republic
(809) 685 - 6198 / (809) 685-3354

ADMISSIONS PROCEDURE

One must first undergo an interview with one of the intake doctors or counselors. This involves the following: (depending upon the illness). Further, fill out completely the enclosed form and fax.

( ) 1. Contact made via telephone.
( ) 2. Fax all pertinent records, i.e.
   ( ) A. Recent bloodwork
   ( ) B. X-Ray, CT, MRI reports
   ( ) C. Biopsy reports
   ( ) D. History/Physical examinations
   ( ) E. Treatment records, to include current medications
   ( ) F. Diagnosis
( ) 3. Fill out information sheet and fax (included here in)
( ) 4. Pre-Admission Exam with consulting doctor where indicated.
( ) 5. Final interview with administrator
( ) 6. Appointment date

After all arrangements are made - all travel, etc. is coordinated through our Administration and North American office of Patient Affairs.
